EMA Aesthetics

At EMA Aesthetics we believe that life is an art and everything we do embraces that art. Our approach is avant-garde designed to challenge the status quo. We focus on combination therapy that enhances aesthetic procedures. Results over sentiment.

At EMA Aesthetics we regard customers as our partners. Working together, we provide best-in-class aesthetic solutions that yield beautiful returns and stunning aesthetic results.

EMA Aesthetics is proud to introduce Préime - the latest innovation in aesthetics.

Préime

It is said that beauty is in the eye of the beholder, Préime challenges that view as we believe that each and every individual can be beautiful in their own power. The empowerment of Bold Beauty, which encourages each individual to be the best version of themselves is the very core of Préime.

We listened to today's 'bold' beauties and discovered who they are and what they want from a skincare brand. We discovered that the world of beauty and the perception of what is considered 'beautiful' is changing. Classical beauty remains, but empowering men and women to be the best version of themselves is of critical importance. Inspired by their stories and needs, we brought these most important ingredients into the lab to create the most innovative skincare range that is packed with power and backed by science.

The name Préime represents high quality, value and results.

#Bold Beauty, Powered By Science.

Sinclair

Sinclair directly employs over 500 people, operating from Corporate headquarters in London with administration conducted from offices in Chester, UK. Energy-based devices are headquartered in Barcelona, with central marketing in Paris and sales offices in Shanghai, Sao Paulo, Mexico City, Bogota, Seoul, London, Paris, Madrid, Barcelona, Milan, Warsaw, Heidelberg, Dubai and Moscow.

Sinclair has a portfolio of differentiated, complementary aesthetics technologies with a focus on collagen stimulation. Our products are experiencing significant growth as we target clinical demand for effective, high quality, longer duration, natural looking and minimally invasive treatments.

Préime DermaFacial

Introducing the
Préime DermaFacial,
the world's most advanced
aesthetic facial device.

The Préime DermaFacial is a pioneer in combination therapy offering five powerful technologies, allowing the curation of personalised treatments.

The Préime DermaFacial has been designed by skincare experts, for skincare experts. Focusing on efficacy, limitless treatment combinations and ease of use, the Préime DermaFacial is the primary skincare platform for clinics, aesthetic centres and medspas.

Drawing on our brands' 17 years professional skincare experience, the Préime DermaFacial uses bespoke Préime DermaCeuticals to deliver proven results, backed by science.

The Préime DermaFacial is a smart device, powered by IoT (Internet of Things) technology, designed to ensure consistent results and client satisfaction. This state-of-the-art system reveals a completely new approach in performing treatments, by delivering actual data to the aesthetic providers. This allows users to understand, examine and constantly improve their own methods and practice.

Designed and manufactured in Europe, the Préime DermaFacial combined with Préime DermaCeuticals is the new global standard in skincare treatments.

#Bold Beauty, Powered By Science.

Combination therapy

Skin care features and steps

Cleanse & Infuse

Cleanse and gentle exfoliation of the skin, while helping to control the size of enlarged pores. This step prepares the skin and infuses nourishing active ingredients that result in uplifted and hydrated skin for a fresh and youthful look.

Exfoliate & Revive

Exfoliate and revive the skin with bespoke microdermabrasion combined with the production of countless CO² bubbles that penetrate the skin to encourage increased blood circulation. The skin will be cleansed and oxygenated, resulting in reenergized skin appearance.

Tighten and Tone

Tighten and tone the skin to support natural collagen and elastin fiber production. This will help to smooth the appearance of fine lines and wrinkles. While firming the skin and muscle, this leaves a youthful look and defined facial contours.

Boost and Rejuvenate

Boost and rejuvenate the skin's complexion by inducing thermal damage, helping to stimulate skin's natural ability to repair itself. It will help to stimulate changes in deep layers of skin allowing it to regenerate and help to create a dense net dermis structure.

Nourish & Moisture

Nourish and moisturise the skin by assisting transdermal absorption of active ingredients. It will help to improve moisture retention, absorption of active ingredients and will contribute to the appearance of healthy skin.

Préime DermaFacial System & Technologies

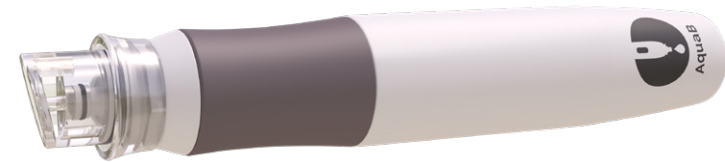

The Préime DermaFacial system offers five powerful technologies, allowing the curation of personalised treatments.

The system provides a multitude of treatment options both for standalone and combination therapy. It is compatible with non-invasive procedures and leverages other aesthetics treatments to deliver an optimum experience alongside premium results.*

AquaB

Spiral vacuum + specific solutions

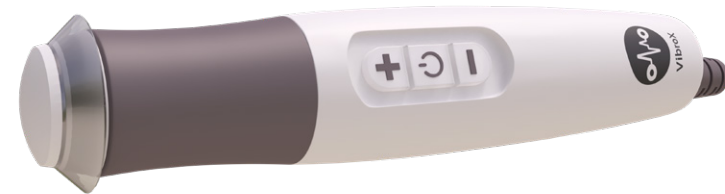

Used synergistically with Préime DermaCeuticals' bespoke skincare solutions, AquaB merges high-tech spiral movement with vacuum technology. This cleanses, hydrates and prepares the skin for the next step in facial procedure.

VibroX

CO² Microdermabrasion + Vibration + Red LED

This innovative microdermabrasion technology integrates vibration frequency and red LED light to offer significant improvements in the appearance of skin tone and texture. We combined VibroX with Préime DermaCeuticals gels and pod to produce the Bohr Effect where CO² microbubbles increase oxygen delivery and support skin revival.

MicroT

Bipolar Microcurrent 400Hz

MicroT uses microcurrent technology to support muscle toning. These tiny electrical currents offer an improved smoothness of the skin by toning and stimulating facial muscles reducing visible skin laxity and enhance the appearance of facial contouring.

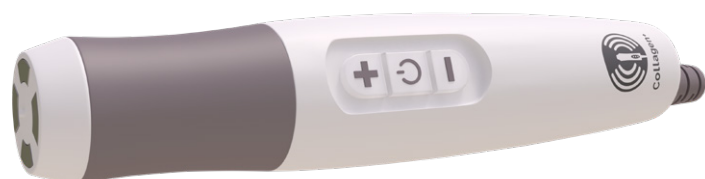

** It is important to first assess skin condition and contraindications prior to providing any Préime DermaFacial treatment.*

Collagen +

Dual bipolar Radio Frequency 1MHz

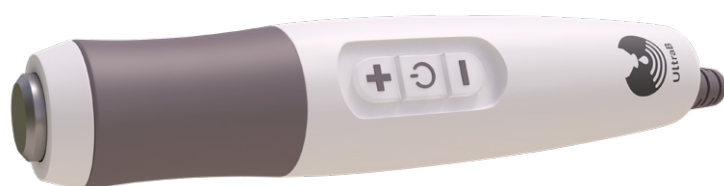

Collagen + harnesses the power of 1MHz radio frequency energy to evenly heat up the skin to 39-42 °C. This therapy helps encourage natural collagen and elastin production. This supports the appearance of firmer, rejuvenated skin.

UltraB

Ultrasound 1MHz

This 1MHz high-frequency thermal ultrasound technology assists in the transdermal absorption of Prème DermaCeuticals solutions. This encourages better absorption of active ingredients, thus accelerating moisture retention and offering significant aesthetic benefits to visibly improve the appearance of the skin.

Préime DermaFacial & Préime DermaCeuticals

Drawing on 17 years professional skincare experience, the Préime DermaFacial Skin Management Platform uses exclusive and bespoke Préime DermaCeuticals to encourage the curation of personalized treatments. The Préime DermaFacial supports both standalone and combination therapy. Together, Préime DermaFacial and Préime DermaCeuticals offer new global gold standard in premium facial treatments.

AquaB consumables

AquaB

L + P + H + Step 1: Cleanse

- LACTIC ACID +
- PANTHENOL +
- HYALURONIC ACID +

L + P + H + Step 1: Cleanse is a deep cleansing and hydrating solution for all skin types. It contains a blend of actives including Lactic Acid to gently exfoliate, deeply clean and unclog pores and impurities.

The addition of Panthenol and Hyaluronic Acid also ensure increased hydration and a noticeable improvement in the texture of the skin.

S + T + N + Step 2: Purify

- SALICYLIC ACID +
- TOCOPHEROL +
- NIACINAMIDE +

S + T + N + Step 2: Purify is a purifying solution that targets excess sebum, blackheads and whiteheads. It is formulated with Salicylic Acid to improve cell turnover and accelerate the natural sloughing of dead skin cells from the skin's superficial layer. This helps decrease redness, swelling and inflammation.

Combined with Tocopherol and Niacinamide, this solution has also been proven to neutralize free radicals and reduce oxidative stress.

H + Z + P + Step 3: Nourish

- HYALURONIC ACID +
- ZINC GLUCONATE +
- PANTHENOL +

H + Z + P + Step 3: Nourish is a nourishing solution to increase hydration after exfoliation. Hyaluronic Acid and Panthenol work together to encourage the skin to produce moisture and hydrate from within.

The addition of Zinc Gluconate provides calming benefits to minimize inflammation, promote healing and reduce the longevity of breakouts.

P + A + Step 4: Rinse

- PROPYLENE GLYCOL +
- ALCOHOL DENAT +

P + A + Step 4: Rinse is rinsing solution, used at the end of the AquaB step to methodically clean the system, ensuring it is adequately cleaned and ready for the next client.

AquaB Tips

- Large Tip is used over the entire face.
- Small Tip is used specifically for the T zone and around the nasal area.
- Cleaning Tip allows the system to be meticulously cleansed between treatments.

Benefits:

- Cleansing
- Gentle exfoliation
- Hydration

VibroX

A + N + P + Microdermabrasion Bright Kit

- ALPHA ARBUTIN +
- NIACINAMIDE +
- PANTHENOL +

A + N + P + Microdermabrasion Bright kit brightens, soothes and enlivens the skin. It is infused with Alpha Arbutin and Niacinamide to reduce the appearance of discoloration and minimize the visible signs of environmental damage. Panthenol has also been added for its soothing and calming properties. Together with VibroX pod the skin is also exfoliated and oxygenated.

A + H + P + Microdermabrasion Fresh Kit

- ALOE BARBADENSIS +
- HYALURONIC ACID +
- PANTHENOL +

A + H + P + Microdermabrasion Fresh Kit is gel formulated to improve the overall appearance of aging skin by reducing the visibility of fine lines and wrinkles. As an addition this treatment delivers a combination of Aloe Barbadensis, Hyaluronic Acid and Panthenol to hydrate the skin with nutrients. Together with VibroX pod the skin is also exfoliated and nourished.

VibroX Pod Microdermabrasion capsule for Bright & Fresh kits

- TARTARIC ACID +
- SODIUM BICARBONAT +
- SODIUM CHLORIDE +

This VibroX Pod is part of Prème DermaFacial microdermabrasion Bright and Fresh kits treatments. VibroX capsule combines powerful ingredients to gently exfoliate the skin and delivery of actives from Bright or Fresh gels.

VibroX Massage tip

VibroX Massage Tips are used during the final stages of the treatment to give clients a gently stimulating facial massage.

Benefits:

- Deep exfoliation
- Skin tissue oxygenation
- Brighter and even skin complexion
- Revitalized, tighter skin

Bold Beauty, Powered by Science.

MicroT consumables

MicroT

Apply any generic ultrasound gel.

Benefits :

- Improved muscle tone
- Firm and tight skin
- Reduced appearance of wrinkles

UltraB consumables

UltraB

P + H + T + Hydrating and Soothing Serum

- PANTHENOL +
- HYALURONIC ACID +
- TOCOPHEROL +

P + H + T + is a hydrating and soothing serum that boosts the skin recovery. This single dose serum with ultra-light texture is used with UltraB ultrasound technology to calm and hydrate the skin for optimal comfort during Préime DermaFacial treatment.

Collagen + consumables

Collagen+

G+A+ RF Conducting gel

- GLYCERIN +
- AQUA +

G + A + RF Conducting Gel is a conductive gel created specifically for the Préime DermaFacial Collagen + radio frequency (RF) system. It provides smooth contact with the skin and ensures an even transfer of energy during every treatment.

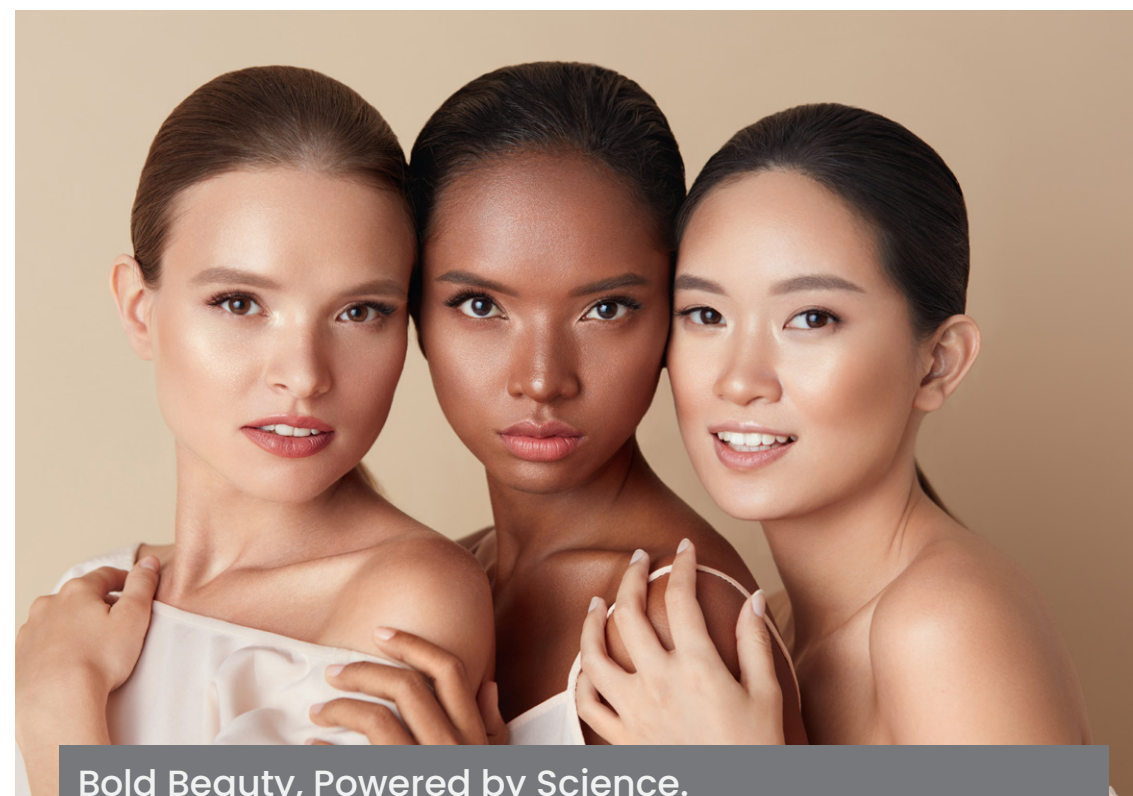

Benefits:

- Supports collagen production
- Firmer and tighter skin
- Reduce appearance of fine lines

Benefits :

- Skin absorption of nutrients
- Improves moisture retention
- Healthy skin appearance
